

EMMANUEL NKEREUWEM

FULL STACK DEVELOPER

nkememmanuel5505@gmail.com | <https://github.com/emmystark> | <https://emmanuelnkereuwem.vercel.app>

PROFESSIONAL SUMMARY

Dynamic full-stack developer with five years of experience in crafting scalable web applications using React.js for frontend, Node.js and Express.js for backend APIs, PostgreSQL for database management, and AWS for deployment and server management. Proven expertise in end-to-end application integration, RESTful API development, and version control with Git. Skilled in optimizing performance, ensuring data integrity, and delivering high-impact solutions through remote collaboration.

TECHNICAL SKILLS

- **Proficient:** React.js • Next.js • Node.js • Express.js • PostgreSQL • Supabase • AWS (EC2, S3, RDS) REST APIs • Solidity • Git
- **Additional:** Python • FastAPI • Django • Tailwind CSS • CI/CD pipelines

PROFESSIONAL EXPERIENCE

Full Stack Developer at Sentinel - Full Stack Web App

Jan 2026 - April 2026

- Delivered a production-grade full-stack web application in under 8 weeks by rapidly prototyping features and iterating to meet aggressive deadlines.
- Built responsive React.js interfaces and scalable Node.js/Express.js backend APIs with real-time data processing and secure authentication.

Full Stack Developer at Hypertask (Web3 Full-Stack Web App)

Nov 2025 - Dec 2025

- Engineered and deployed a complete Web3 application with token deployment in only 4 weeks while maintaining high code quality and security standards.
- Developed React.js frontend components with Tailwind CSS, delivering a polished, mobile-first user experience.

Full Stack Developer, Private Chatbot for Companies (Fintech)

Aug 2025 - Oct 2025

- Created secure React.js frontend for a document-based fintech chatbot, enabling intuitive user interactions with sensitive financial data.
- Designed Node.js/Express.js backend APIs integrated with natural language understanding (NLU) and implemented fraud-prevention REST endpoints.
- Managed PostgreSQL database for inventory, transactions, and file processing with strict privacy and data integrity controls.

Freelance Full-Stack Developer, Multiple Clients & Web3 Projects

2021 - 2025

- Engineered SOLMEME Solana meme token & NFT platform (solme.me), implementing community airdrops, exclusive mints, and engagement tools to build a thriving no-pre-sale enthusiast network.
- Built Copeville Web3 gaming platform (weepingplebs.com), integrating immersive gameplay, action-packed modes, and Solana blockchain for seamless multiplayer experiences.
- Rebuilt Green Treat Ltd website, showcasing 250+ projects and 150 clients with interactive services and testimonials.
- Launched Ijebu Alare Association Chicago portal (ijebualarechicago.com), featuring cultural galleries, testimonials, networking tools, scholarships, and youth programs.
- Delivered xrcLabs scalable full-stack web application with responsive design and complete end-to-end features.
