PROFESSIONAL SUMMARY

Founding engineer and CTO with hands-on ownership across the full stack, from RAG pipelines and multi-tenant infrastructure to security audits and production deployment. Currently CTO and sole engineer at ProvidiusTech, a multi-tenant AI customer support platform recognized by the NVIDIA Inception program, and technical co-founder at Beldium, a compliance and marketplace platform for Nigeria's solid minerals sector. Background in mechatronics engineering, with an ongoing interest in IoT and voice assistant hardware.

CORE SKILLS

Languages: Python, JavaScript, TypeScript, Node.js

AI / ML: LLMs, LangChain, LangGraph, RAG Implementation, Fine-tuning, NLP, Machine Learning

Backend: FastAPI, Django, Django REST Framework, Express.js, REST APIs, OOP

Databases: PostgreSQL, MySQL, MongoDB, SQL, NoSQL, pgvector

Cloud & DevOps: AWS (EC2, S3, CodePipeline), Azure, Docker, Netlify, CI/CD Pipelines, Git, GitHub

Frontend: React, Next.js, TypeScript, TailwindCSS, Redux

PROFESSIONAL EXPERIENCE

Founding Engineer & CTO | *ProvidiusTech*

2025 – Present

- Led architecture and delivery of a multi-tenant AI customer support platform unifying WhatsApp, email, webchat, Telegram, and social DMs into one AI-powered inbox, recognized by the NVIDIA Inception program
- Built a multilingual RAG pipeline supporting Amharic and Tigrinya alongside major languages
- Designed a dual-channel email architecture across AWS SES and Gmail OAuth with per-tenant mutual exclusion, secured with KMS envelope encryption
- Built the billing and usage enforcement engine from scratch, and automated deployment via GitHub Actions

Stack: FastAPI, PostgreSQL, pgvector, Next.js, AWS (EC2, RDS, SES, KMS), GitHub Actions, Docker

Technical Co-Founder & CTO | *Beldium*

Jun 2026 – Present

- Compliance and marketplace platform connecting miners, buyers, and financing partners across Nigeria's solid minerals sector
- Audited the codebase against actual delivery and rebuilt the 12-week roadmap around verified progress
- Diagnosed and resolved a multi-layer email infrastructure failure spanning SPF, MX, and DKIM/DMARC; removed leaked credentials from 238 commits of git history and rotated all affected keys

Backend Engineer | *IBORO – AI Chatbot for Companies*

2025 – Aug 2026

- Built a secure Python/LangChain backend enabling companies to run document-based queries over internal and financial data, with NLU and file processing for sensitive financial data
- Refined system accuracy through iterative testing and cut development time with reusable React components

Senior Full Stack Engineer | *Sentinel – Full-Stack Web Application*

Jan 2026 – Apr 2026

- Shipped a production application in eight weeks, leading frontend development in React and backend APIs in Node.js/Express with a PostgreSQL database

Senior Full Stack Engineer | *Hypertask – Web3 Application*

Nov 2025 – Dec 2025

- Shipped a full Web3 application with token deployment in a four-week sprint, using React/Tailwind CSS on the frontend and Node.js/Express for token interactions

ML Team Lead | *ORDERCAST – GROUP10 E-Commerce Capstone*

2025

- Led a three-person team building a model to predict order cancellation on a Nigerian e-commerce dataset, catching two feature leakage issues and setting the evaluation framework

FREELANCE & CLIENT ENGAGEMENTS

2021 – 2025

- SolMeme & Dwello – DeFi/NFT platform for a Solana meme token; decentralized real estate marketplace with smart contracts and MetaMask integration
- Weeping Plebs (Copeville) – Frontend for a Web3 gaming platform with wallet connections
- Green Treat Ltd & Ijebu Alare Association Chicago – WordPress platforms for a construction firm and a Nigerian diaspora cultural organization

EDUCATION

Software Engineering Intensive – ALX | Cohort 9, Aug 2019 – Oct 2020

Background in Mechatronics Engineering
